## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 2-15 and 17-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, claim 7 recites “a control bit that specifies whether to assemble the output signal from multiple VT or TU connections or handle the output signal as an STS or AU connection” in line 3. Similar limitations are found in independent claim 18 and 24. VT are used with SONET and TU are used with SDH. Similarly, STS is used with SONET and AU is used with SDH. It is unclear whether the claimed invention receives both SONET and SDH frames. Furthermore, the examiner could not find the support for such limitation in the specification.

### ***Response to Arguments***

3. Applicant's arguments with respect to claim 2-15 and 17-27 have been considered but are moot in view of the new ground(s) of rejection.
